

Stephen Fulpahs

Solo Developer / AI-Augmented Builder / Founder, SWS Strategic Media LLC

Ohio, USA (Eastern Time, flexible hours) stephenfulpahs@gmail.com github.com/Stephenuffugus

PROFILE

Solo developer based in the United States. I build complex production systems quickly using Claude Code as roughly 60% of my coding velocity, and I write or review every line of architecture myself. The output is real: a patent-filed cryptographic protocol, a 96k-line Pi Network ecosystem game with a Solidity smart contract on Polygon, deployed PWAs, and an ECDSA-signed content-provenance pipeline. Looking for senior IC, founding-engineer, or fractional consulting roles. Fully remote. \$140-200K base or \$120-150/hr fractional.

SHIPPED IN THE LAST 60 DAYS

SWS Attention Protocol (USPTO SWS-PROV-001 filed March 17, 2026, owned by SWS Strategic Media LLC). A cryptographically-signed receipt that proves a real human paid attention during an online task, verifiable offline against a public JWK. 270+ tests across 45 suites green. 7 rounds of hostile adversarial review; ~85 findings closed; attacker bypass cost shifted from ~\$50/month to \$5,000-20,000/month. YC Summer 2026 applicant. Live: sws-attention-proofs.web.app/demo.html.

Stack: Firebase, Cloud Functions, Ed25519, JWKS rotation, OpenTimestamps Bitcoin anchoring, 23 peer-reviewed behavioral signals.

Lucid Winds. A 96,000-line single-file vanilla JS game on Pi Network with 58 mini-games, server-validated economy, procedural one-of-one NFT plants minted on Polygon via my own Solidity contract (LucidWindsPlant.sol), real-world GPS planting mode, and a custom procedural haiku generator. 2,927 commits. Submitting to Pi App Studio May 9, 2026. Live: lucidwinds.com.

Stack: Vanilla JS (ES5), Firebase Auth + Firestore, Pi Network SDK, Solidity / Polygon, Leaflet, deterministic SHA-256-to-SVG plant generation.

SnapBinder. A deployed mobile-first PWA with a 4-layer on-device content-provenance pipeline: aspect-ratio heuristic, NSFW.js, Tesseract OCR, and ECDSA P-256 signing via Web Crypto API. ~7,353 LOC shipped end-to-end in a single build session. Live: snapbinder-sigma.vercel.app.

Stack: Next.js 16, React 19, Tailwind v4, Three.js / React-Three-Fiber, TensorFlow.js, Tesseract.js, Service Worker / PWA.

Trackfit. A live PWA solving a constraint-knapsack problem for model-railroad hobbyists with ranked near-miss suggestions. ~19,173 lines across a 7-package TypeScript monorepo. 21 test files. 405-piece library across 16 track systems. Live: trackfit.stevieweedseed.com.

Stack: TypeScript, React, Vite, Tailwind, pnpm workspaces, Vitest, GitHub Pages, Cloudflare Worker proxy, PWA.

BarBrawl. Location-based mobile RPG with a deterministic combat engine. ~7,100 LOC + 338 tests across 27 suites in the game-core package. 21 skill trees / 189 nodes. 26 item bases x 80 tiered affixes (loot distribution verified to plus or minus 0.5% over 100k rolls). Decoupled engine runs identically in Node, React Native, and the browser.

Stack: TypeScript strict, Expo SDK 52, Supabase (Postgres + PostGIS + RLS + Edge Functions), GitHub Actions CI, Vitest.

steveweedseed.com. Live affiliate-revenue site, generates real income, not actively maintained while I bridge-fund YC.

Plus a patent-worthy AR multiplayer prototype currently in pre-disclosure stealth, and an automated quantitative system on prediction markets that has been net-positive since launch.

HOW I WORK

Multi-agent Claude Code orchestration as baseline workflow. Up to 10 parallel agents on independent tasks on a complex day. 21 commits in a single complex day. AI tools as power tools; every line of architecture is mine. Adversarial self-review before shipping; every product gets hostile rounds before I call it done. Honest about AI-augmented workflow with every employer.

WHAT I'M LOOKING FOR

Senior IC, founding-engineer, or fractional CTO roles. Fully remote. Eastern Time default, willing to flex earlier (UK / Europe overlap) or later (Australia / NZ overlap). Open to occasional travel for client visits, on-sites, or team gatherings. Floor: \$140K base. Range: \$140-200K + equity. Open to fractional consulting at \$120-150/hr.

Will not sign non-competes touching attention measurement, fraud detection, credentialing, or training compliance.
